

CZ 4M RECON JACKET

RECONNAISSANCE JACKET

Blouse for reconnaissance and combat operations CZ 4M RECON are based on the requirements of the reconnaissance units of the Army of the Czech Republic.

MATERIALS

· The Heavy Duty (HD) material combines the strength and durability of polyamide fibres (PAD) with a ripstop mesh and the best cotton yarn, which is soft and comfortable for most conditions in which it is expected to be used. The main advantage of the HD material is high resistance to mechanical damage, including protection against cuts by sharp objects or thorns, providing the highest degree of protection in all types of operations.

· The Light Season (LS) material is made of a combination of polyester fibres (PES) with a ripstop mesh and the best cotton yarn, which is soft and comfortable for most conditions under which it is expected to be used. The LS material combines high breathability and strength, which makes it suitable for warm weather conditions, etc. The material is provided with special TEFLON® treatment bound to the fibres, which ensures long-term resistance to water, oils, etc.

Color	Material	Size
Black FDE, Multicam®, Czech Camo	HD 230 g/m ² , LS 200 g/m ²	S, M, L, XL, XXL + tall size

DESIGN

The special anatomic design of the sleeves enables full freedom of movement without the use of elastic fabric belts, as is the case with competing products. The RECON blouse features the design benefits of the OMEGA uniform series.

- The sleeves allow inserting all available types of elbow protectors.
- Openable underarm ventilation holes.
- Sleeve pockets accessible from above and from the side.
- Front chest pockets accessible even if a ballistic vest is worn
- The zipper sliders are also positioned outside the area under the ballistic vest to prevent secondary injuries when the vest is hit in the zipper area.
